

## **Electronics**

### **Elektronik Services in Hardware/Opto/ASIC-Design**

Each application has its particular needs. We regard it as our special mission to also provide solutions where standard sensors fail to meet your requirements. Whether customized sensor area geometries, dedicated filters or specialized packages, we develop and manufacture optoelectronic sensors to your specification.

- on-chip optoelectronic components and systems
- mixed-signal ASICs for sensor signal processing
- on-wafer interference filter layer coating
- packaging
- characterization and commercial delivery of components
- Support in design work

### **Sensor Design and Manufacturing Services**
